About the Remote Survey

INTRODUCTION

This survey contains vital data for an entire sector. Possession of this information is allowed via security scan by a duly-authorized representative only!

The following is a recovered datafeed from the archives at Terra/Luna:

#
# I was looking at my LBB collection, and got an idea, so voila!
# Presenting the Traveller Sector Guidebook .cgi script. Creates and returns
# a high-resolution (vector-art) pdf containing the sector data and hexmaps,
# listed subsector by subsector.
#
# Requires:
# - James M. Perkins' Traveller software programs
#   http://traveller.mu.org/archive/software/SW4
# - pstopdf
#   (built in on Mac OSX)
# - enscript
#   (built in on Mac OSX)
# - pdftk
#   http://freshmeat.projects.org/pdftk
# - Paul J. Netherwood's 'full-upp'
#
#
# Using sector tools, the sector data and individual subsector data is
# created, and the PostScript hexmap is generated. Using pstopdf, the PostScript
# hexmap is converted to a pdf. Using enscript, the text sector data is
# converted to a PostScript file.

DATA SOURCES

The information contained herein was obtained by Long-Range probabilistic observation techniques, the operations and technology of which remain highly classified. Due to quantum probabilistic effects of spacetime, the data contained in this report may represent an actual sector of space. Personnel who are exposed to this report are directed to handle this information accordingly, and to present themselves to Military Intelligence for re-education if required.

ABBREVIATIONS

Abbreviations are used to describe the following:
